

VANTARA

The journey behind every repair

Site functionalities — vehicle intake & repair tracking board

Dashboard overview

- Total vehicles currently on record
- Active jobs count (awaiting diagnosis + in progress)
- Vehicles awaiting parts
- Vehicles ready for pickup
- Total outstanding cost across all unfinished jobs

Search & filter

- Live search across plate number, owner name, make, model, and VIN
- Status filter chips: All, Awaiting diagnosis, In progress, Awaiting parts, Ready for pickup, Completed

New intake (work order form)

- Vehicle details — make, model, year, plate number, VIN / chassis number
- Owner details — name and phone number
- Date brought in
- Complaints — add any number of reported issues, each as its own line; rows can be added or removed freely
- Costs — separate parts cost and labor cost fields
- Status — set the starting stage of the job

Vehicle ticket cards (the board)

- Plate number, make / model / year, owner, and up to three complaints per card (with a "+N more" indicator)
- Date brought in and running total cost shown on every card
- A rotated stamp badge shows the current status at a glance
- Cards are colour-coded by status for fast scanning across the board

Vehicle detail view

- Full complaint list for the vehicle
- Cost breakdown — parts, labor, and total
- Status dropdown — change the stage at any time; every change is logged automatically
- Work progress log — a running, timestamped timeline of notes; add new notes at any point to record what was done
- Edit button to update any of the vehicle's details
- Remove button to delete the ticket entirely, with a confirmation prompt

Download PDF (job sheet)

- Generates a printable, branded job sheet for a single vehicle
- Includes vehicle and owner details, ticket number, complaints, cost breakdown, current status, and the full progress log
- Opens the browser's print dialog — choose "Save as PDF" to download it

Data & persistence

- All entries save automatically — no login or backend setup required
- Data is shared: anyone who opens this same file sees and can update the same live board, which suits multiple staff working from one board
